SCRIPT-CONTROLLED ACL

2. Requirement Analysis

Functional requirements include creating an EEE test user and the custom roles bb1, bb2, bb3 and bb4.

Create the u_institution_details table with Student Roll Number, Student Name, Faculty Name, Branch, Email, Phone Number and Description fields.

The Branch field contains ECE, EEE and CSE choices.

Security requirements: Read access requires bb1; Create access requires bb2; Write access requires bb3; Delete access requires bb4. Administrators retain full access.
